Method of Solvent Extraction for Processing Edible Oil: PEMAC Projects is an expert in designing and building edible oil refinery plants in India, Africa, and several other nations. We offer a comprehensive range of edible oil equipment, including solvent extraction machinery, oil expeller plants, and oil mill plant equipment. Our expertise extends to cooking oil plants, vegetable oil refinery plants, and palm oil refinery plants. Additionally, we provide solutions for biodiesel plants, dewaxing plant equipment, winterization plants, and acid oil splitting plants. PEMAC Projects also caters to specialized needs such as rice bran oil solvent extraction plants, soybean oil solvent extraction plants, shea butter extraction, sunflower oil refinery plant and mustard oil processing. We manufacture stearic acid powder flacks and offer a wide array of solvent extraction plant equipment, ensuring efficient and high-quality oil production.
